

## Success Story

### Michelle Fisher

In late 2005, Michelle's teenage daughter had begun to suffer from severe headaches, joint pains, dizziness and was experiencing difficulty in sleeping. Her own specialist recommended numerous tests and eventually diagnosed Chronic Fatigue Syndrome.

Whilst working with her daughter's own specialist, Michelle had also contacted Best Doctors. The in-depth assessment undertaken by the world-leading expert resulted in possible alternative diagnosis and proposed two specific tests not originally identified by the treating consultant.

*"...I couldn't fault the service at all, our case was handled with the utmost speed and respect...I was very impressed with the individual service I received from our dedicated case manager at Best Doctors."*

Michelle has access to the Best Doctors Employee Benefit as part of the Group Income Protection insurance benefit provided by her employer.
